-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A telephone call was made to Mr. Gero McClellan on 4/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-16, drawn to method of deriving data representative of a condition of a pipeline, classified in class 73, subclass 623.

II. Claims 17-19 drawn to a computer readable medium, classified in class 708, subclass 311.

III. Claims 20-23 drawn to a pipeline pig system, classified in class 73, subclass 579.

IV. Claims 24-30 drawn to a pipeline pig system, classified in class 73, subclass 579.

3. Inventions I and II are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be carried out without the interaction of the physical structure and debris formed on the pipeline.

4. Inventions I and III are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be carried out without the interaction of the physical structure and debris formed on the pipeline.

Art Unit: 2856

5. Inventions I and IV are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be carried out without the interaction of the physical structure and debris formed on the pipeline.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamiko D. Bellamy whose telephone number is (571) 272-2190. The examiner can normally be reached on Monday - Friday 7:30 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
